

UrbanWINS webinar

How can urban metabolism lead to a circular economy and a more sustainable future for cities?

Wednesday 5th July, 11.00-12.30 (CET)

Cities can be compared to living organisms that eat, digest and discard what is not needed. Understanding what resources are required to nourish the city activities, how these resources are used and what the flow of energy and materials is, and what kind of waste is produced can be useful for cities aiming to improve their strategies to prevent, reduce, reuse, recycle and manage waste.

To register, send an email to: <u>urbanwins@iclei.org</u> Link to the webinar: <u>https://global.gotomeeting.com/join/447945509</u>

11.00 Welcome and introduction

Meritxell Díaz, Communications Officer, ICLEI European Secretariat

11.05 What is urban metabolism and how do UrbanWINS cities plan to use the results of their urban metabolism analysis?

Leonardo Rosado, Assistant Professor, Department of Architecture and Civil Engineering, Division of Water Environment Technology, University of Chalmers, Sweden

11.25 Urban metabolism for tourism in Copenhagen. Introduction to the Urban Waste project and the waste management in the City of Copenhagen

Line Brogaard MSc. PhD, City Development, The Technical and Environmental Administration, City of Copenhagen

11.45 What is circular economy about?

Estela Grana, Sustainable Economy and Procurement Officer, ICLEI European Secretariat

12.05 Urban metabolism, a key step for circular cities Paul Mul, Sustainability Consultant, Royal HaskoningDHV, The Netherlands

12.20 Questions and answers

The project has received funding from the European Union's Horizon 2020 research and innovation programme under grant Agreement No. 690047.
