

Ecodeep - Eco-efficiency and Eco-management in the Agro Industrial Sector in Portugal

F. Figueiredo¹, É. G. Castanheira¹ and F. Freire¹

¹ADAI-LAETA - Center for Industrial Ecology (CIE), University of Coimbra, Portugal (<http://www2.dem.uc.pt/CenterIndustrialEcology>)

Objectives

- Increase the competitiveness, sustainability and innovation in the **Portuguese agri-food sector** through the development of innovative methodologies based on the concept of **life cycle assessment**;
- **Provide benchmark** and key figures to the **agro-industrial sector** in order to **promote environmental assessment** projects and **reduce the environmental impact** of agro-industrial production systems.

Agri-food chains

Surveyed companies

Meat 34

Dairy products 22

Olive and vegetable oils 24

Wine 33

Fish 6

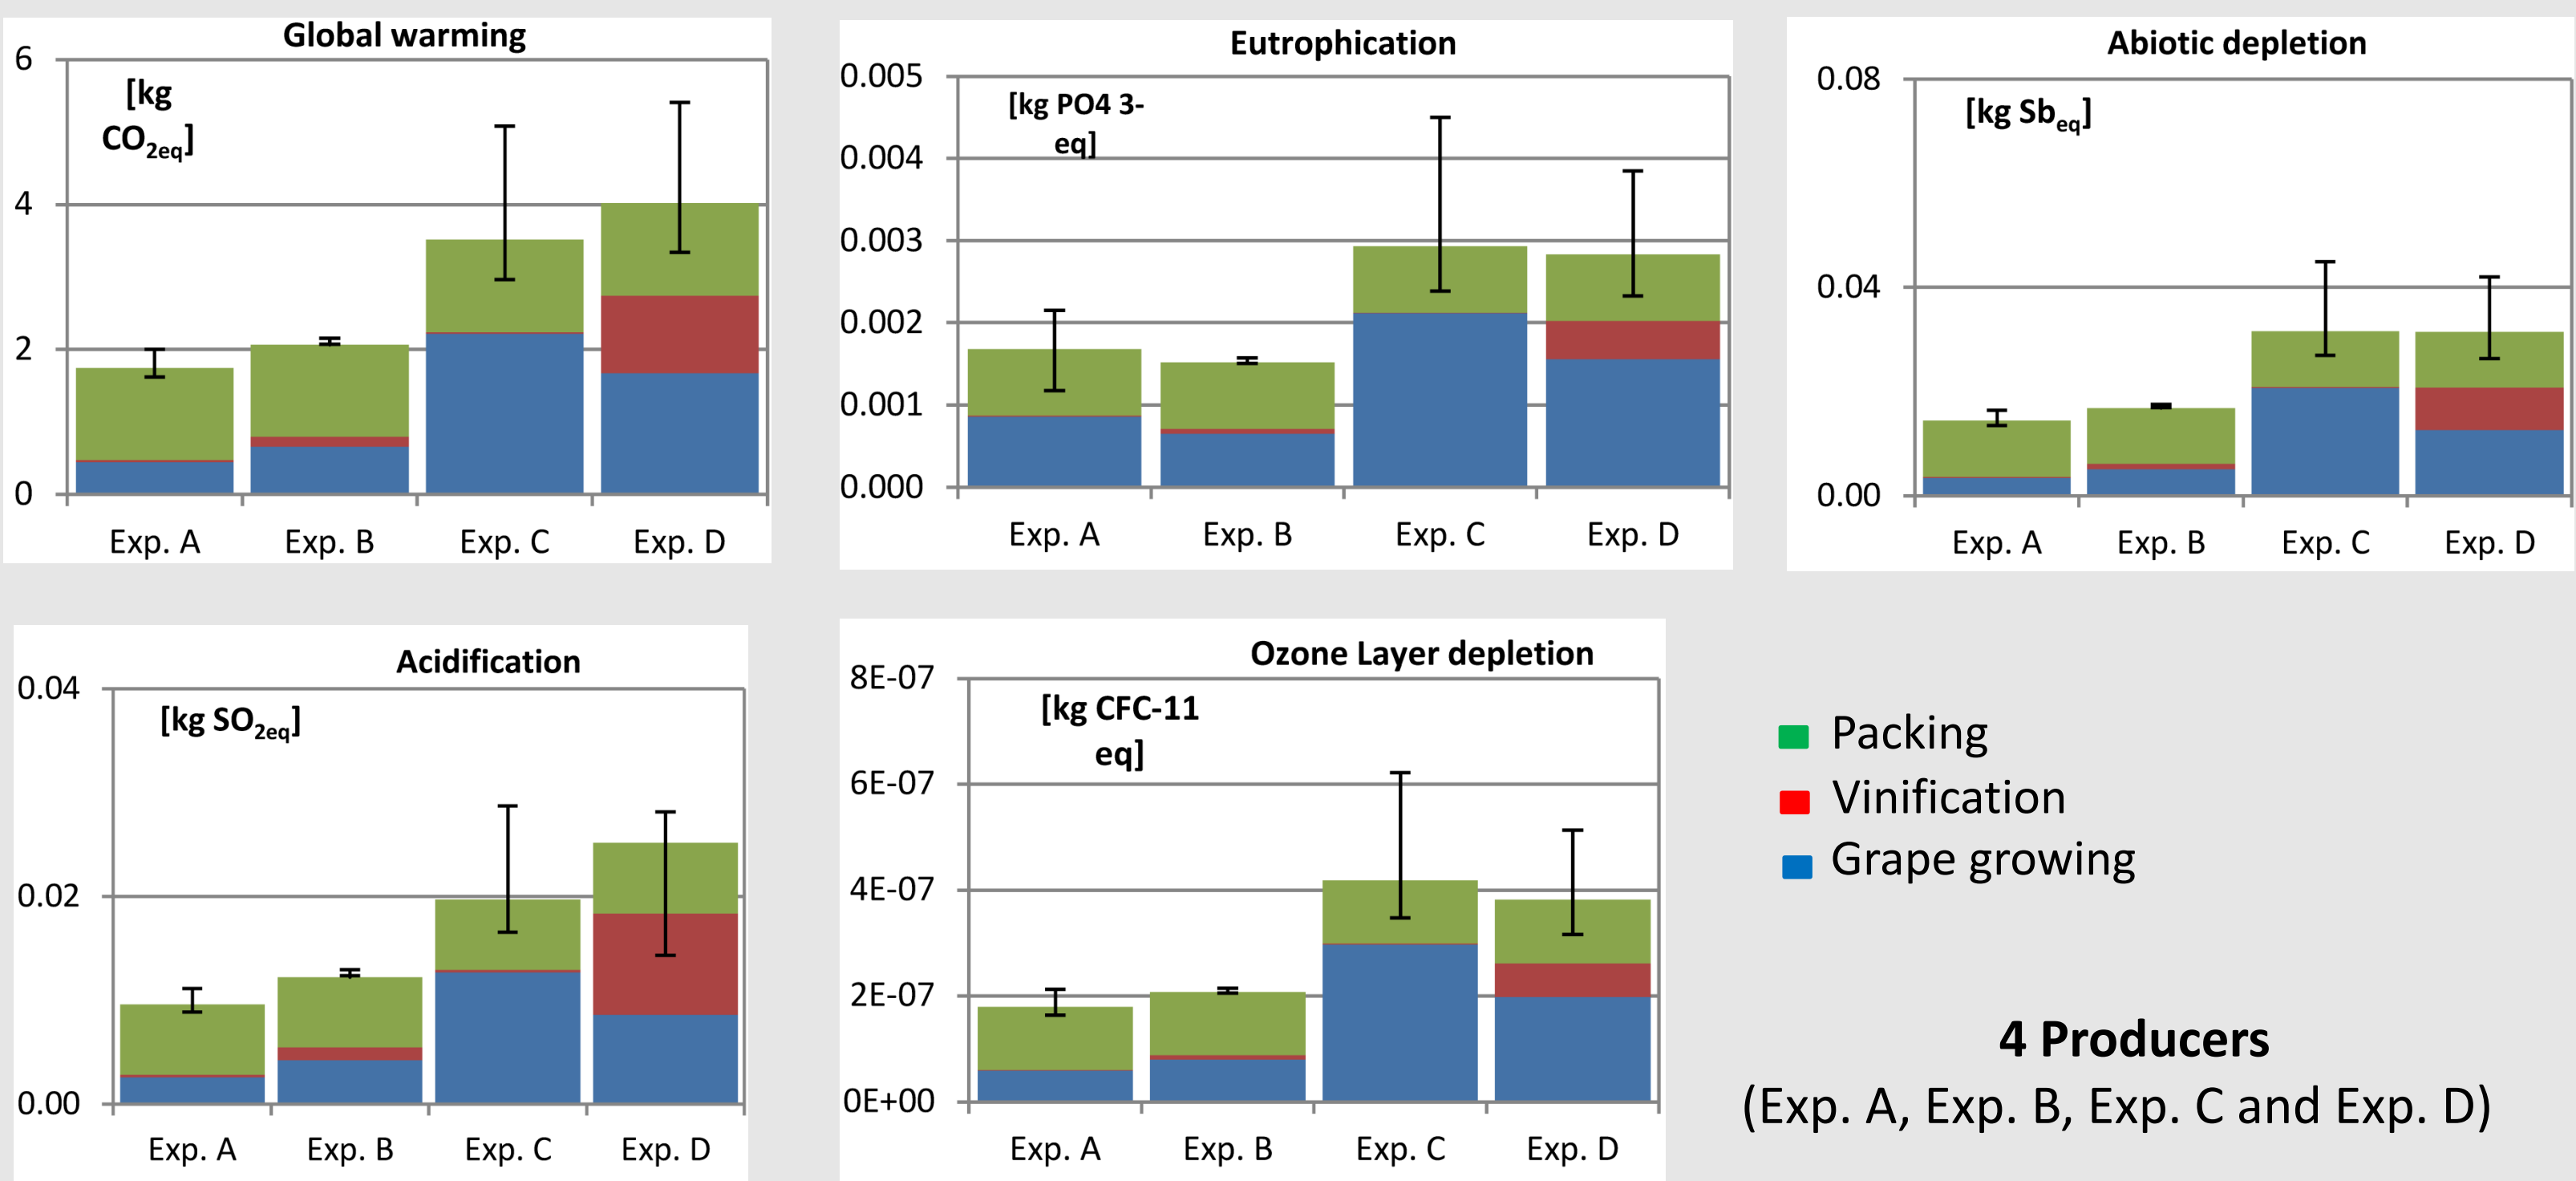

Fruits and vegetables 39

Preliminary results

Wine
(UF: 5L wine)

Orchards: apple and pear
(UF: 1 kg fruit)

Cultivation

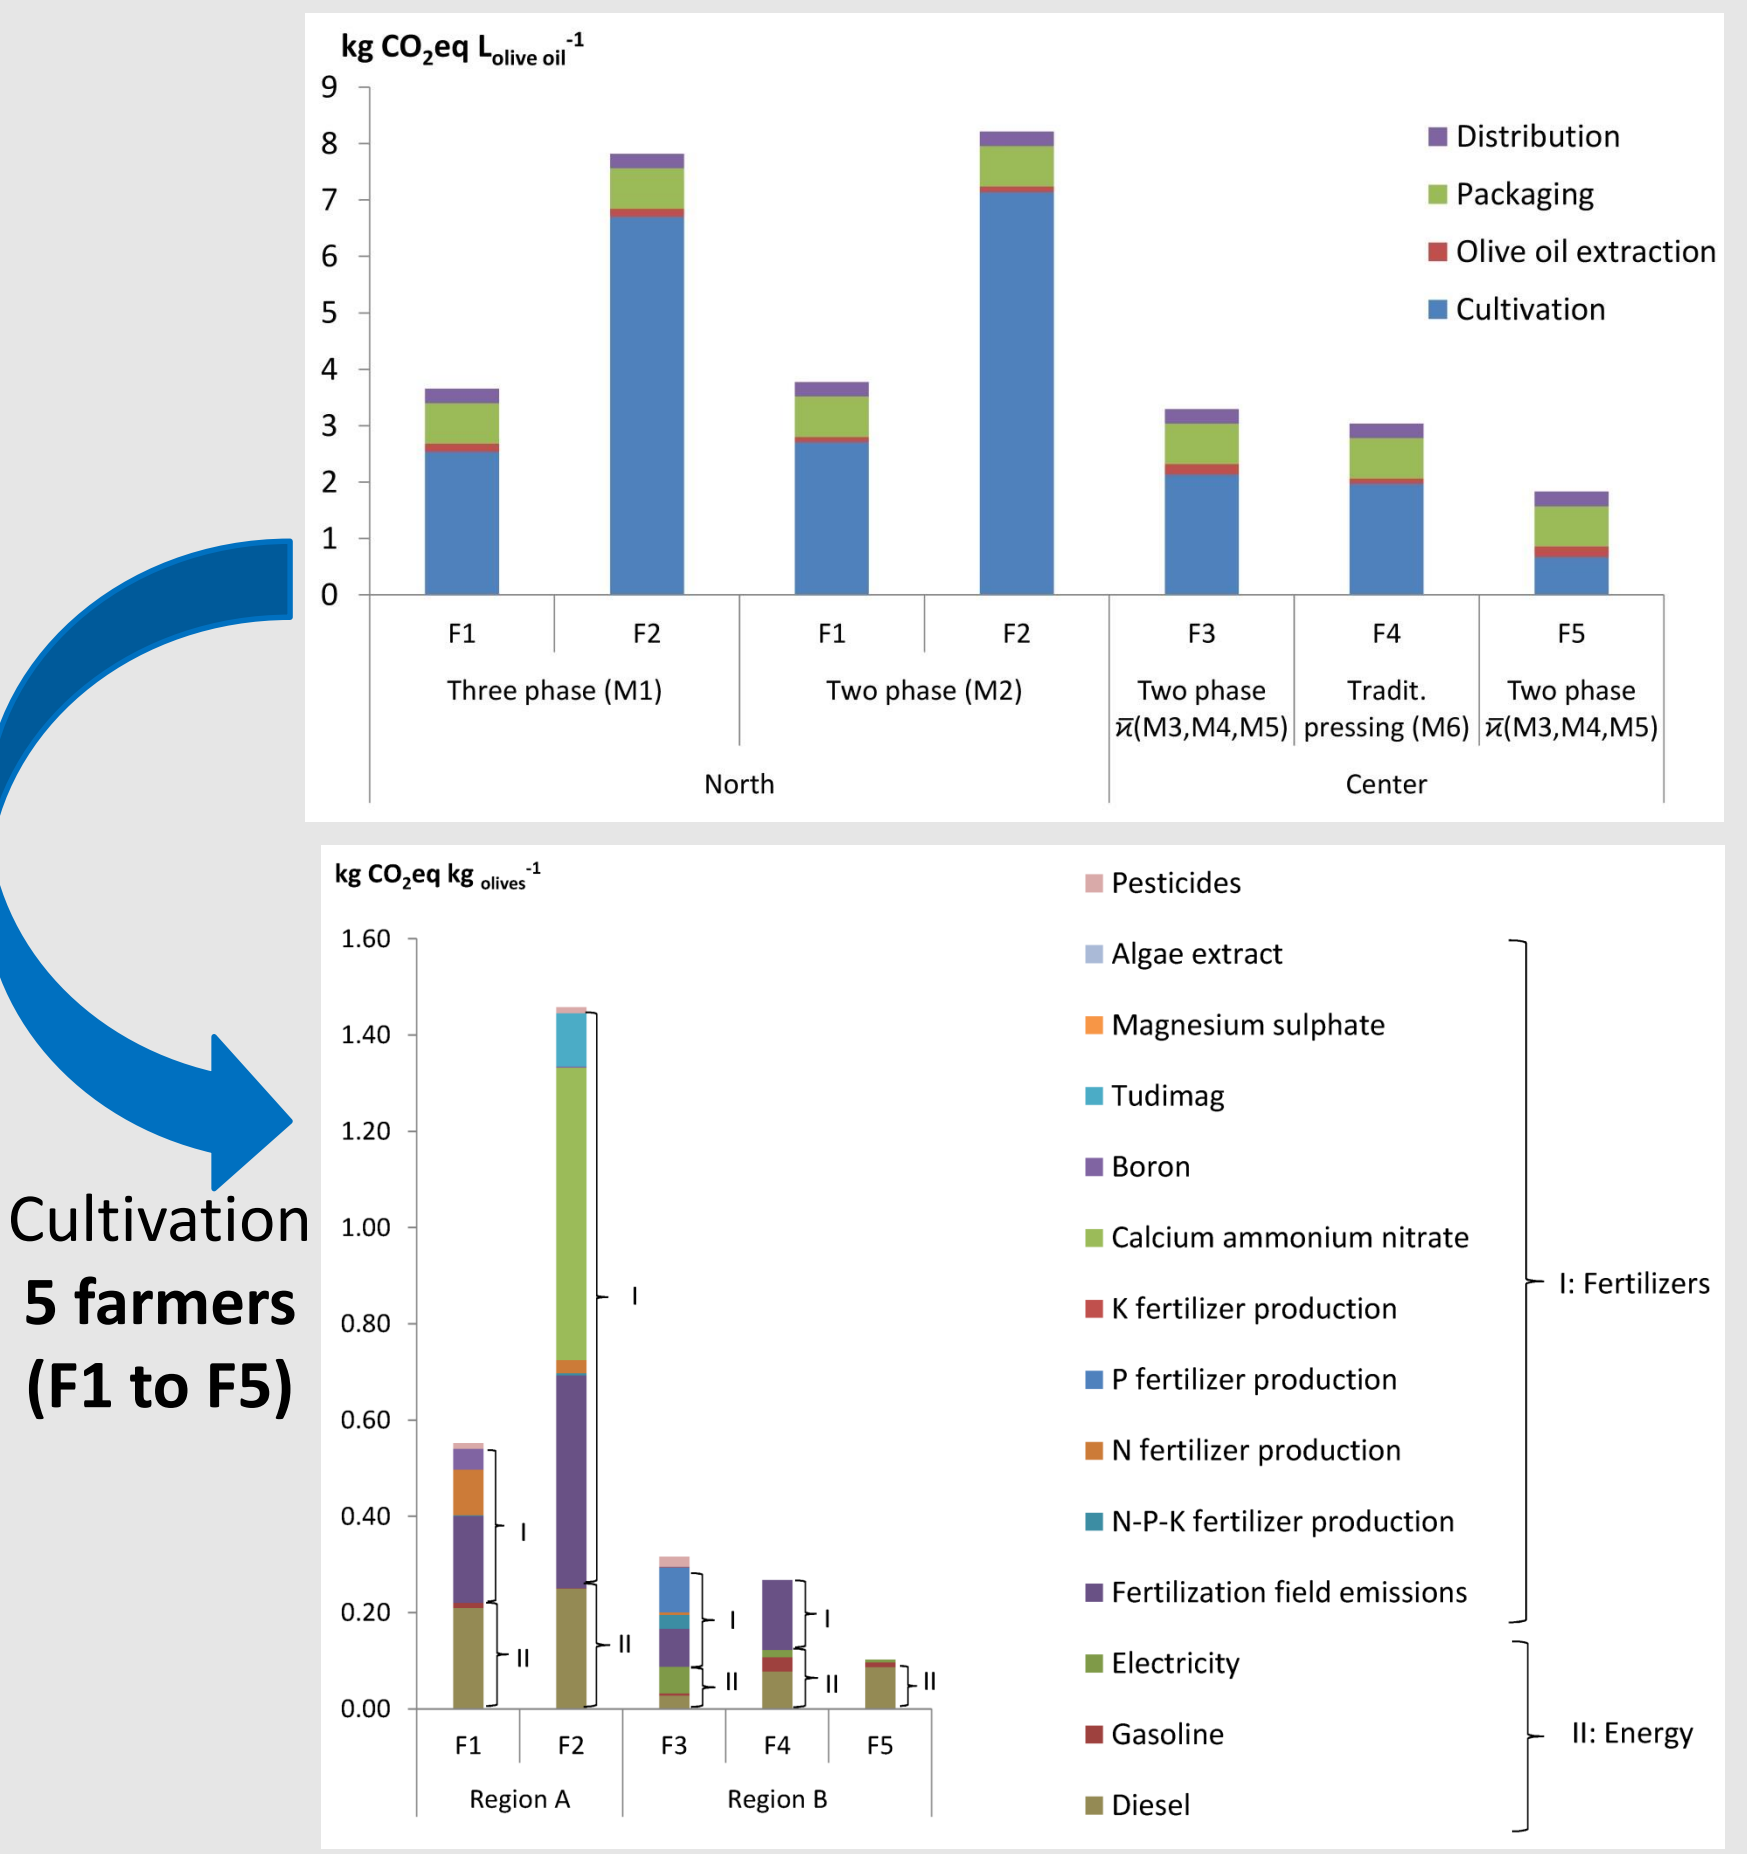

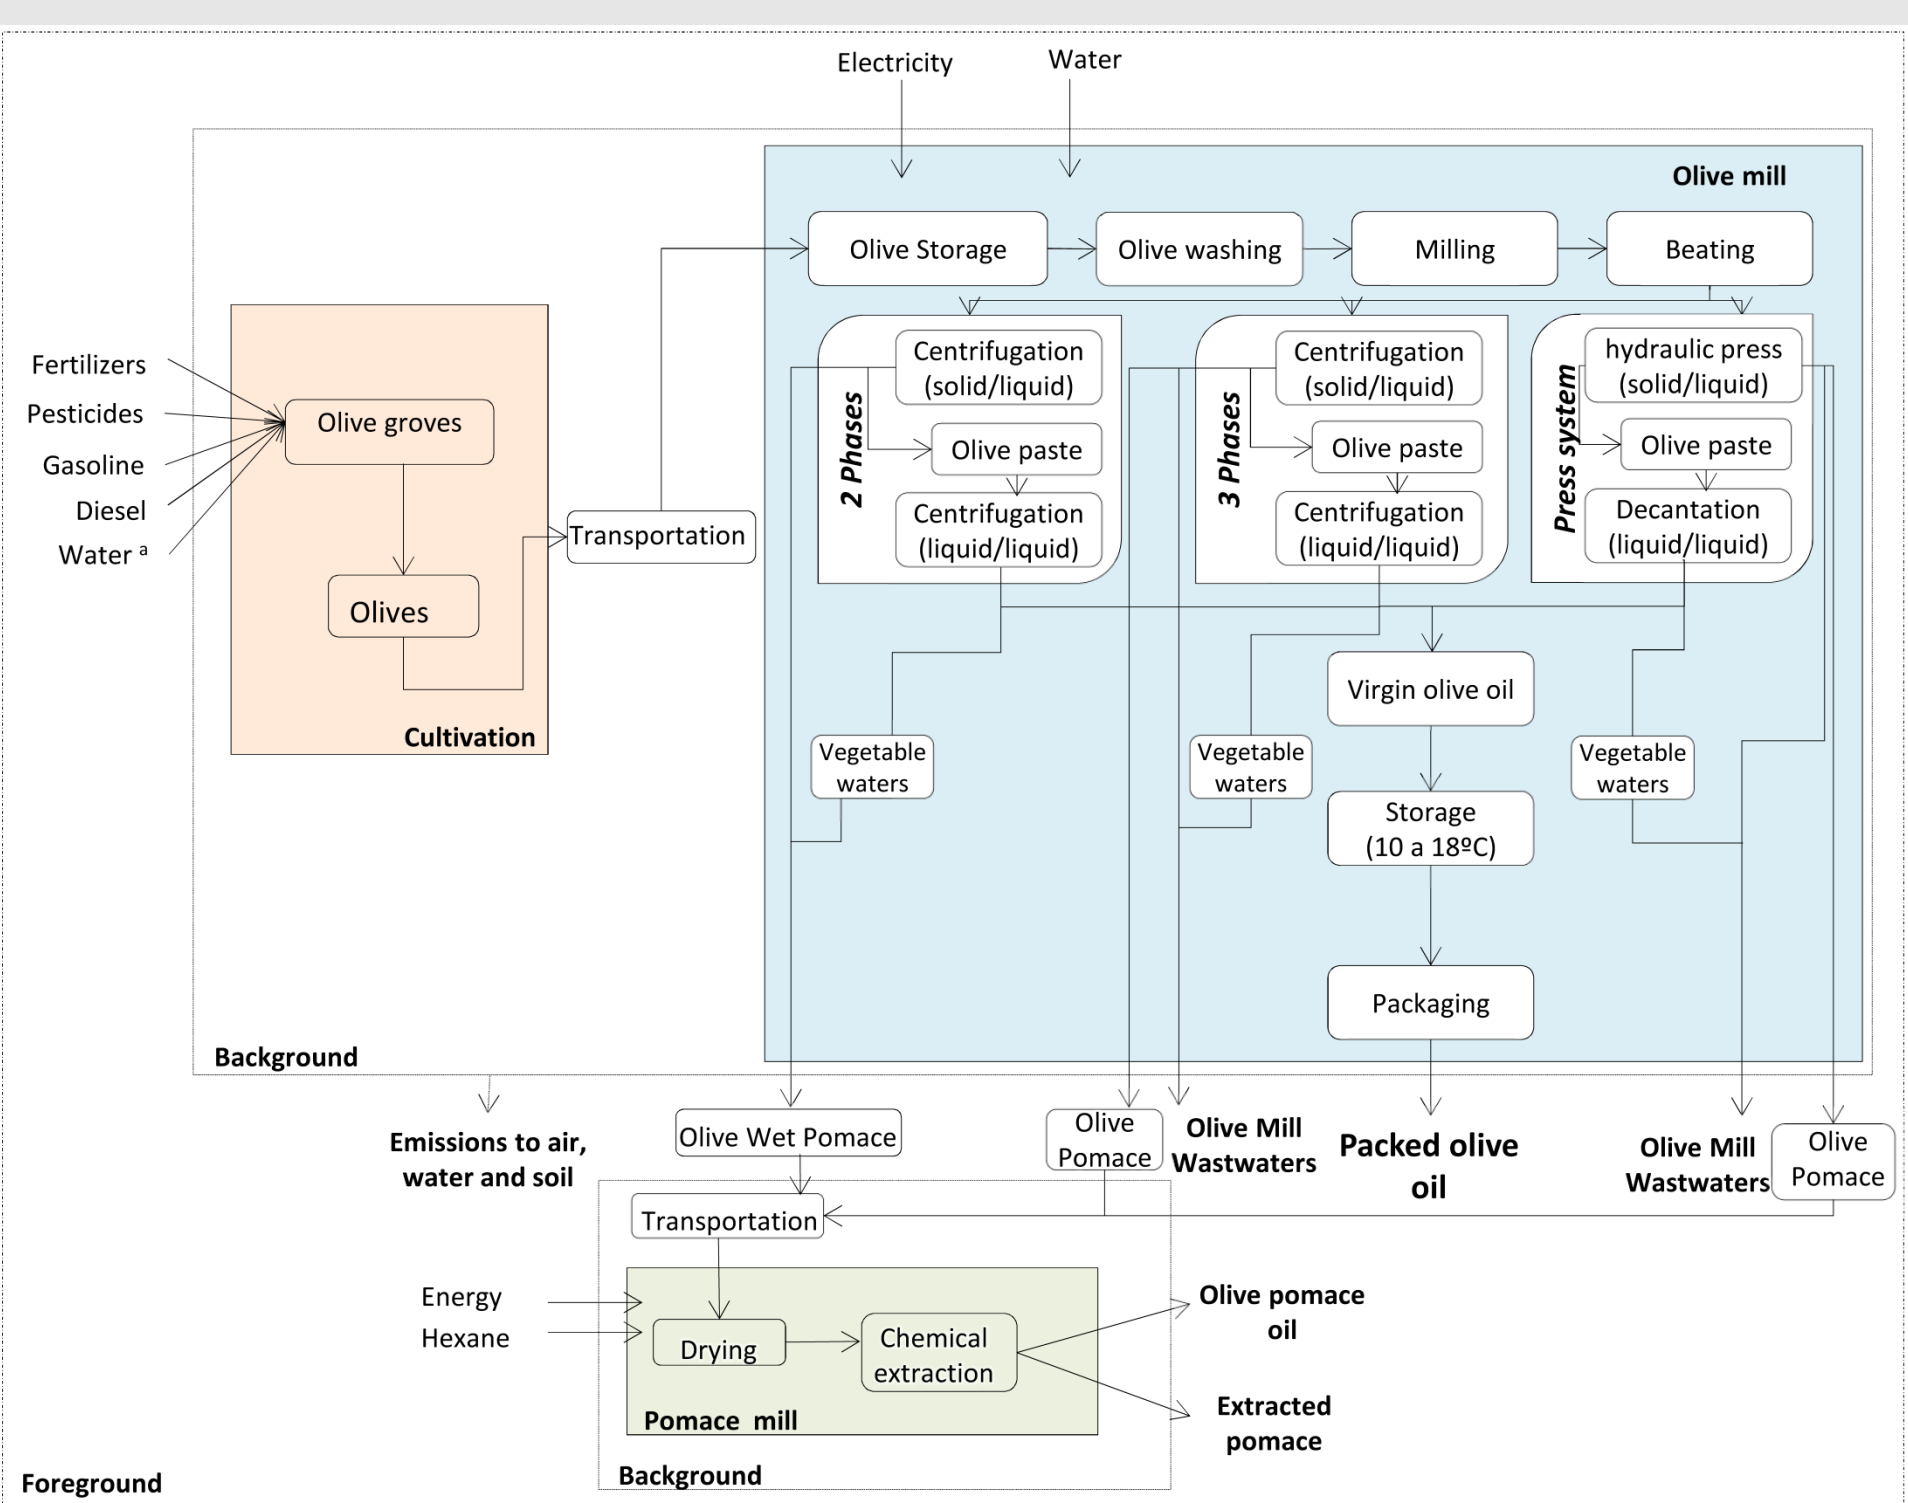

Storage

- 4 farmers (Aa, Ab, C and D)
- 2 Storage companies (S_A and S_F)

Olive oil chain (UF: 1L olive oil)

Outcomes: EPDs (environmental product declaration), environmental footprint (EC), user-friendly tools (online), manuals.

Acknowledgments: The study was developed within the research project ECODEEP (FCOMP-05-0128-FEDER-018643).
